CAREER CONTOUR

I am unwavering, meticulous, and highly competent in the **Pharmaceutical/Manufacturing Industry** I have a consistent record of transporting the best results-driven work with a proven ability to implement my work in an organized manner for **18+ years** of my successful career.

My expertise:- **Pharmaceutical/Manufacturing Industry – Production Management, Manufacturing Operations, Regulatory Compliance, Quality Assurance, Documentation Management, Project Management, International Audits, Troubleshooting, Validation Protocols, Leadership Skills, Planning and Execution, Sourcing and Time Management.** I have in-depth knowledge of all ethics of management. I possess effective communication skills and am a team player with strong Organizational, Logical, and Problem-Solving Abilities.

I have great exposure to working with large-scale organizations like **Pet Food & Pharma, M/S Sharon Bio-Medicine Ltd.** I have well-versed skills in analysis, problem-solving, and coordination, which make me so successful and dedicated. Strong influencing and negotiation skills coupled with a proven ability to think in and out of the box, generating new solutions.

I have commenced my profession as an **Executive** and risen myself as **Manager Production** reputed company. I would like to see myself growing with the passing years of hard work and dedication. I have been awarded many accolades for my result-oriented hard work.

Armed with a multitude of competencies and work experiences, I am confident to carry forward any organization's vision & objectives with sufficient ease and dedication to my job responsibility.

EXPERIENCE

Jul'2023 – Till Date | Pet Food & Pharma | As Manager Production

Responsibility:-

- Manage and maintain QMS production documentation for compliance with industry standards and regulations.
- Handle deviations, change controls, and market complaints, and conduct risk assessments to ensure product quality and safety.
- Oversee manufacturing processes for Tablets, hard gelatin Capsules, and Dry powders, optimizing machine utilization.
- Lead the Production Team to execute production plans and processes effectively, fostering a culture of excellence and teamwork.
- Review and approve SOPs and Batch Records, contributing to high-quality documentation.
- Take responsibility for batch creation and manage ERP activities for accuracy and compliance.

- Generate, review, and approve Change Controls, Deviations, Market Complaints, and associated Risk Assessments and Investigations.
- Review procedures/systems to ensure compliance with regulatory agencies' observations.
- Manage internal and external audits, ensuring compliance and implementing corrective actions.
- Oversee training initiatives to equip the team with the necessary skills and knowledge for operational and compliance standards.
- Ensure strict audit compliance with cGMP requirements to uphold quality standards in manufacturing.
- Troubleshoot manufacturing issues effectively, demonstrating problem-solving skills in challenging situations.
- Address non-conformities related to manufacturing processes to maintain product quality.
- Take accountability for batch yields at all stages of production, ensuring efficiency and consistency.
- Authorize written procedures and documents, including amendments, to uphold documentation integrity.
- Oversee manufacturing activities, ensuring strict adherence to approved documented procedures for predefined quality standards.
- Evaluate and authorize production records before submission to QA to guarantee accuracy and compliance.
- Actively participate in the preparation and implementation of validation protocols, ensuring adherence to established procedures.
- Enforce plant hygiene standards to maintain a clean and safe working environment.
- Monitor personnel hygiene and health conditions of production department employees.
- Conduct regular checks on the maintenance of the department, premises, and equipment to ensure operational efficiency.
- Manage manpower allocation and job assignments on a daily/shift basis for optimal productivity.
- Ensure proper storage conditions for materials and products to prevent quality issues.
- Actively participate in continuous improvement initiatives for cost-effective productivity and enhanced quality.
- Take accountability for department machinery, including changing parts and proper segregation with clear identification.
- Strive to achieve overall efficiency and meet timelines in all production processes.
